Core Modules: Financial Instruments, Investment, Financial Risk Management, Microeconomics, Macroeconomics, etc.		
<b>2020.04-2026.04 (part-time)</b>	<b>University of London</b>	<b>BSc Computer Science</b>
Grades: 85+ (First Class Honor)		
<b>2022.08-2023.12</b>	<b>Northwestern University</b>	<b>MSc Social and Economic Policy</b>
<b>2022.08-2023.12</b>	<b>Chinese University of Hong Kong</b>	<b>MSc Applied Economics</b>

## RESEARCH EXPERIENCE

### **2020.07-2022.07                      IBSS research project integrated with Final Year Project (cooperate with NZCFPN)**

*Funds: 5,000 RMB    Supervised by: Dr. Eddy Fang, Dr Tony So (XJTLU) and Dr. Phil Bremer (University of Otago)*

To investigate people's perception of how other countries coped with COVID-19 and imported food safety, roughly 500 e-questionnaires were delivered and a report was written based on responses. After designing the questionnaire and processing the data with SPSS. By OLS, factors that influence people's choices were identified through conducting the hypothesis test.

The outcome shielding lights on people's perception of imported food after several scandals and under the context of COVID-19. It is highly praised by New Zealand China Food Protection Network and was ranked as 1<sup>st</sup> among all projects.

### **2020.07-2020.08                      Final Year Project**

*Funds: 5,000 RMB    Supervised by: Dr. Eddy Fang and Dr Tony So (XJTLU)*

The daily diet of meat actually has significant impacts on the environment. As the environmental impact of consuming conventional are more and more revealed, scientists started to create new sustainable technologies and product to reduce conventional meat demands. After the substitutions of plant-based meat and insects are not widely accepted by the public, the in-vitro meat to the limelight. To understand the attitudes of Chinese consumers, this paper studied the acceptance of it and its determinants as well as the Willingness to Pay (WTP) with Contingent Valuation(CV) by issuing questionnaires through Wenjuanxing online. The results of 914 valid responses revealed that the acceptance of cultured meat is still under doubt in terms of its average of acceptance is 4.40 on a 7-point scale.

## CAMPUS EXPERIENCE

### **2019.03-2020.03                      English Debate Society (EDS)**

Plan large-school level activities. During the first semester of 2019-2020. We successfully established the first Special Guests Series, in which Mr. Stein, the general counsel in the American Embassy in Shanghai. Achieved attracting more than 50 students through the information released from email, posters and Wechat.

Operated Suzhou Debate Open, a British debate competition, is also held by EDS. In the 2th SDO in 2019, about 80 teams from different countries signed up for this event.

On behalf of XJTLU, I participated in international speech and debate competitions AUAP Speech competition.

## CERTIFICATION & SKILL

### **Programming Language:**

Introductory: Stata, MySQL, MATLAB, JavaScript, Python

Intermediate: R

### **Language:**

Mandarin(Native)

English(Business)
